

Staken birch, with lampshade Linåkra. Price: 6 000 skr.

Floorlamp Staken

A floor lamp that might have been designed as early as 1928, but officially the year is 1941.

It has a simple but ingenious function with an adjustable arm held up by its own friction and weight. A better example of Carl Malmstens way to express a beautiful shape combined with useful function is hard to find.
